## A Detailed Comparison between IMRS 2000 Complete/Pro and Bemer® Classic/Pro.

The iMRS 2000 and Bemer therapy systems are the two top selling full body PEMF therapy devices worldwide.

Both use lower and safer intensities and both have a full body mat and local applicators along with several accessories.

The comparisons that follow use technical specs from both companies directly. The main specs are the frequencies, the intensities and the waveforms used. Information below from iMRS 2000 Users' manual and Bemer.com website and FAQ pdf.

In this detailed comparison we have stuck with the facts as listed in both products company brochures and websites, and only the facts. If you look at both units BY THE NUMBERS and not emotionally based on rah rah rah meetings, marketing, propaganda, hype or sales pitches, you will see the iMRS 2000 wins HANDILY in every way possible.
